DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Tuesday, 06 June 2023 at 05:28 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Levels of air pollution are expected to be Low today. However a few pockets of Moderate air pollution may develop in places, especially along coastal areas in the south of England.

Tomorrow: Continuing warm, sunny conditions will cause air quality to worsen across the south of England and Wales, with Moderate air pollution in some areas.

Outlook: Very little change is expected over the following days as weather conditions remain warm and sunny. As a result, we may see further Moderate pollution levels continuing, particularly in southwestern areas.
